Placings_Beat one angler off a next peg:
Placings_Not my best day out.....:
Winner's weight: 43
Date: February 24, 2009
Time: 01:42:35 PM

Water conditions:

The depth was around 3ft and the water was clear as the fish are not very active.
The temperature of the water was around 8 degrees celsius.

Weather:

The weather was very windy and cold

Baits used:

I used the micro winter size Biosource treated pellets which were the sample i recieved, and was the first time I used them. I used them straight out of the bag and fished a 4mm expander pellet on the hook.

Feeding:

I fed them through a small knider pot on the end of my pole and put a pinchful probably about 40 in every put in.

Comments:

Very good bait and certainly worked as the win proves. As soon as i fed them there were bubbles appearing from the bottom where the fish were obviously feeding
